

## Knowledge Test

Main test with 1<sup>st</sup> extra

URL: <http://guerrareyesdiego.afxsolutions.com/testing6/>

2<sup>nd</sup> extra

URL: <http://guerrareyesdiego.afxsolutions.com/gentleman/>

What problems you experienced

My biggest problem was the deployment on my server. I had problems with requests to the database using AJAX. My intention was to review every second changes in the database. I had to set it to 10 seconds.

Another "problem" I had was the aesthetic choice for the Main test. Since it took me longer than the programming itself.

What you could not solve

The problem mentioned above: regarding requests to the database.

How long it took you to program

Programming of the Main test with 1<sup>st</sup> extra: 1 hour, 15 minutes

Aesthetic design of the Main test with 1<sup>st</sup> extra: 2 hour

Programming of the 2<sup>nd</sup> extra: 1 hour
